

Projecte PEL - JAVASCRIPT

Projecte de Centre PEL - JavaScript

1. Visualise the ten most spoken languages and the ten most populated countries in the world using DOM. To obtain the project data, download it through Promises from the website <https://restcountries.eu/rest/v2/all>.

Use the knowledge acquired in class to calculate the data and manipulate the DOM using JavaScript.

Make a presentation of what you have implemented to present in class and discuss it with your classmates.

2. Record a video explaining the results (maximum duration 1 minute) and send the video to the padlet.com platform (<https://padlet.com/joamba/2zxf0komr6dy9gtr>) to share it with the class.
