

## Exercise 3

On the blog project, add these changes:

- Use the following webpages to retrieve information on how to convert your blog project to a multilingual website:
  - <https://laravel.com/docs/9.x/localization> ;
  - <https://lokalise.com/blog/laravel-localization-step-by-step/>
- Make a research in the internet to find the correct way to write the different words and expressions in your website from English to Valencian, Spanish and French.
- Discuss with your classmates your findings and get to an agreement to choose the proper way to express the words and expressions.

### What to submit?

You will have to compress the blog project with all the incorporated changes, and deleting the **vendor** and **node\_modules** folders as explained in the last unit. Rename the compressed file to **blog\_03** (.zip or .tar.gz).
